WE ARE NOW AGENTS

FOR THE

FAMOUS HART PARR TRACTORS

The New Hart Parr has three speeds forward. A Plowing Speed of 3 1-3 miles per hour. An all purpose Tractor in three sizes, 12-24, 18-36, and 28-50.

The 18-36 will pull four plows at 3 1-3 miles per hour and has plenty of reserve power.

More Power for Less Money. Let Us Demonstrate.

HORSES TAKEN IN TRADE

TREDAWAY & SPRINGSTEEN, Crossfield

Lecture, Demonstration and Movie Films Interesting

From the famous "Bluenose" fishing fleets of Lunenburg and the iron mines of Sydney to the logging camps of British Columbia is a far cry. Yet those who were fortunate enough to attend the special Chevrolet Chassis Lecture and Demonstration held in the U.F.A. hall on Tuesday eve, viewed these scenes and many more from the length and breadth of the Dominion, illustrative of the nation's vast natural resources and scenic wonders.

"Chvrolet across Canada" is the title of the highly educational moving picture which was specially taken for the Chevrolet Motor Company of Canada and was shown here under the auspices of F. T. Baker, local dealer. Chevrolet cars and trucks were seen playing their part in the Nova Scotia fishing and mining industry, or doing their bit in the building of good roads in the Prairie Provinces. Gathering the nation's wheat in the Canadian west, the same sturdy vehicles were shown beside the combines loading grain for speedy transportation to the elevators.

Thrills of another kind were seen in Ontario where numbers of Chevrolet trucks do service as fire engines. A fire truck was pictured making a record run and fighting and putting out a real live fire. A horrible railway accident was narrowly averted through the efficiency of the cars four wheel brakes.

Most of the principal Canadian cities visited by the camera man were shown on the screen. In Montreal the audience saw the large fleet of Chevrolet cars and trucks in the service of the Bell Telephone Company. At Toronto were seen fleets of two dozen Canadian Pacific express trucks starting out on their runs.

The towering Rocky mountains, pictures of Banff and the placid waters of Lake Louise, the tall timbers of British Columbia, and the bathing scenes at English Bay, Vancouver, were among the scenic pictures of the Chevrolet film.

Following the moving picture film an interesting and instructive description of the inner workings of the new Chevrolet Six was afforded the audience by means of an illustrated lecture delivered by Mr. J. Cornwall, of Oshawa, Chevrolet expert.

Crossfield Lifts Kremer Curling Challenge Cup

"Happy" Williams In Great Form

Two Crossfield curling rinks went to Innisfail on Tuesday eve., to compete for the Kremer Cup.

The rink skipped by Wiallams defeated the Veteran Edgar, of Innisfail 18-9, while Kirkham, of Innisfail, won from Pogue, Crossfield, 15-9, thus making the final score 24 to 27 for the visitors.

The ice was in perfect shape and it was a battle royal to the close of the game. At the 15th end the score stood 24-25 in favor of Crossfield. On the sixteenth end the visitors scored one point each, which gave them a three point margin at the finish.

The Veteran Edgar had Happy Williams 7-0 in four ends, but the consistent curling by Williams put sufficient pamp in his team mates to encourage them to victory.

Crossfield rinks were: Williams, skip; Whitefield, 3rd; McRory, 2nd; McMillan, lead. Pogue, skip; Myers, 3rd; C. Purvis, 2nd, Thomas, lead.

Local and General

Mr. J. Harrison shipped a load of cattle on Tuesday.

Tredaway & Springsteen shipped a carload of logs on Friday.

M. E. Springsteen was a business visitor to Calgary Wednesday. Mr. Roland Amery has rented the home farm to Mr. Foster, of Carstairs.

Lawyer J. Millican, of Calgary, made his regular visit to Crossfield Saturday.

C.R. Ford, teacher the Didsbury school, was a week-end visitor in town.

Mr. and Mrs. A. Cruickshank and Mrs. Whitefield motored to Calgary Monday.

Mr. and Mrs. Arnott and daughter Jean, Mrs. McFadyen and Mrs. Baker motored to Calgary Tuesday.

Mr. P. Royer, our local butcher and livestock dealer, returned on Tuesday's train from a two month business trip to Montreal.

Miss Pearl Stauffer, teacher of the Meadows school was a visitor in town Saturday and also a caller at the Chronicle office.

Mr. D. Walsh, who lives in the Samspon district has rented his farm and equipment to Mr. Strafford, brother of C. C. Stafford.

D. H. Blatchford, of Bottrel, was a visitor in town Monday arranging for the printing of posters for his sale to be held on March 13th.

An old time dance will be held in the U. F. A. Hall on Friday, March 22nd, under the auspices of the Crossfield Women's Institute.

Mr. and Mrs. entertained a few friends on Sunday, the occasion being to celebrate their twentyfirst wedding anniversary. A pleasant time was enjoyed by all.

The following dates have been reserved for dances to be held in the east Crossfield community hall: March 15th Gentlemen \$1. Ladies free. Supper per plate 25c.

Mr. B. Fieldhouse, who resides 5 south west of Crossfield is holding an auction of his livestock, machinery and household goods, etc. on Tuesday, March 19, at 1 o'clock. Leslie Parr, auctioneer.

We understand that Mr. Harkness will reside in Calgary after his auction sale, but will continue in the horse business, working out of Calgary, so we hope to see him in Crossfield district occasionally.

The next regular meeting of the Floral U.F.W.A. will be held at home of Mrs. W. W. Stafford on Wednesday March 13, at 2.30 p.m. Arrangements will be made for the demonstration classes in dress making. All interested visitors are welcome.

Coming Auction Sales

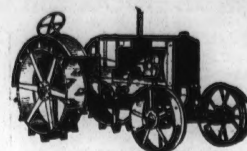

Mr. W. K. Harkness who resides half a mile south of Crossfield is disposing of his entire farm equipment by public auction, on Friday, March 15th. J. W. Durno, is the

John Robertson who resides 15 miles west and 3 miles north of Crossfield is selling his entire farming equipment by public auction, on Tuesday, March 12th, 1929. Archie Boyce is the auctioneer.

Mr. Cris Amussen, 3 miles north and 4 miles west of Crossfield, is holding an auction sale at his farm on Wednesday, March 27th, Archie Boyce is the auctioneer.

Mr. & Son will hold an auction sale at their ranch on Friday, March 22nd, when their machinery, stock, and household goods will be disposed of. Archie Boyce will conduct the sale.

Radio Broadcasting In Canada

The Canadian Government recently appointed a Royal Commission to study and make report on the whole subject of radio broadcasting in Canada. That Commission, headed by Sir John Aird, is at present in Europe studying the methods employed in Great Britain and some of the continental countries. It proposes to also study the methods followed in the United States, and, later, will hold public sittings throughout Canada with a view to obtaining the opinions of Canadian citizens.

The importance of this Commission's work can hardly be over-stated. Radio has, in a few short years, come to occupy a vital position in the lives of the people, while the future possibilities of this newest form of entertainment, and its importance as a means of publicity, are such that the national interests demand that a well defined policy in the interests of all concerned, but more particularly in the interests of the Dominion itself, be developed with the least possible delay.

The question that naturally arises in the minds of patriotic Canadians is whether or not the radio in Canada is to be dominated by wealthy and powerful private interests in the United States, just as the moving picture business has been, or whether Canada will itself develop an acceptable system of national broadcasting.

It has to be recognized and accepted as a fact that the great United States moving picture corporations control the situation in Canada, if not through actual ownership and management of Canadian moving picture theatres, at least through the making and distribution of the films that are shown in this country. There can be no successful denial of the assertion that because of this control of films it is possible for United States ideas, sentiments, enterprises, modes of living, and general propaganda of all kinds, to be insidiously injected into the lives and thoughts of the Canadian people. In a word, one of the most powerful agencies for the dissemination of ideas throughout Canada is in the hands of private and wealthy corporations in a foreign country.

To a large extent the same situation has developed through the enormous circulation which United States magazines and periodicals of all kinds have secured in Canada. Apart from the effect which the reading matter in these periodicals has upon Canadian thought, the advertising matter constitutes a powerful agency attracting millions of Canadian dollars across the line for the purchase of United States products.

In Great Britain radio broadcasting is under the direction of the Government through the medium of a national broadcasting organization. Owners of receiving sets pay a license fee, and the money thus realized is expended in providing worthwhile programmes. In the United States, on the other hand, broadcasting is in the hands of private interests. Good programmes are nationally broadcasted, but they are paid for through advertising sandwiched in at intervals throughout the programmes. All this material, specially prepared for United States consumption and to meet the requirements and promote the interests of United States business, is carried through the air into hundreds of thousands of Canadian homes every day in the year.

It is not necessary to be anti-American, or in the slightest degree unfriendly to the United States, to nevertheless realize that this is not a good thing for Canada in a national sense. Canadian broadcasting stations are widely scattered over the Dominion. They have not the broadcasting power of the big U.S. stations. Nor have they the resources to finance the same type of high class and expensive programmes offered in the United States. Canadian national advertisers have not the same large market to appeal to, and consequently cannot afford to spend tens of thousands of dollars in radio advertising.

Furthermore, do the Canadian people prefer private control of radio broadcasting, financed on the basis of advertising, to the system which finds favor in Great Britain of national broadcasting financed through the payment of a reasonable annual license fee by owners of receiving sets who are the real beneficiaries of the broadcasts? The influence of radio must be admitted. It already occupies a position along with the newspaper and the moving picture as a medium of information and a source of education and entertainment. It is here, and here to stay, to grow, to develop as perhaps few even now imagine. It will be a power for tremendous good or evil. It is essential that Canada, not neglecting the opportunity it presents, should adopt a wise policy in regard thereto.

Many Divorce Cases
With a marked increase in petitions within the past week the select divorce committee has the largest accumulation of divorce cases in history. The number so far is 214, with 188 from Ontario and 26 from Quebec. Wives seeking divorce in 121 cases and husbands in 93.

Minard's Liniment for the Grippe and Flu.

The Porcupine gold area in the District of Cochrane, Northern Ontario, occupies first rank among the gold producing areas in Canada.

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention. One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will not rely on crutches, methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Covered Everything
Candidates for political office, successful or otherwise, who are required by law to file campaign expense returns, may be interested in this particularly succinct one filed in Massachusetts: "Paid nothing, promised nothing, got nothing."

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

At the Paris law courts there is an old lady of 80, who has been employed for the last 50 years as a shorthand writer, and is still active.

Acid Stomach

Italy has forbidden the exhibition in any part of the kingdom of films depicting war episodes.

Canada's Climate Attractive

Even Winter Weather Is Enjoyed By Majority Of People

The Montreal Star says: "It has been the fashion for many years to quote Canada as a wintry land. The habit has persisted, despite the actual facts regarding our climate, which probably presents the widest latitude in conditions of any country in the world today. But just now Europe is having a taste of what a really hard winter can achieve. Steel bridges have been cracked in two by Arctic temperatures of a severity almost unknown in modern records. Shipping in the north is lopsided, and even the Black Sea is beginning to freeze over—an event unrecorded within living memory."

Now if the people who are at present suffering so acutely were in Canada, they would be enjoying themselves. We have not been attacked by an unprecedented cold weather, and the general conditions throughout the country have not been such to cause any discomfort. Indeed, there is good ground for utilizing the attractiveness of our climate as a drawing card for intending immigrants, instead of frightening them with lurid pictures of winter of an Arctic character. A little more truth, and a little less hard rubbish, would help immigration better than lantern slides and flaming posters on the walls."

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for corns. Sold at every drug store.

Peace River Settlement

A Million Acres Of Land Taken Up By 5,000 New Homeowners

Approximately one million acres of land were taken over last year by 5,000 new homeowners in the Peace River country. The Rt. Rev. E. M. Robbins, D.D., Bishop of Athabasca, stated in an address before the Empire Club at Toronto. "People ask me if the country will bear it," he said, "I fancy it will bear it for about 20 years at that rate."

LIFE WAS A BURDEN

Health Restored Through the Use of Dr. Williams' Pink Pills

"I am writing to express my gratitude for what Dr. Williams' Pink Pills have done for me," says Mrs. W. J. Downing, Tottenham, Ont., and further says: "I was so badly run down that I felt that life was a burden. The doctor said my trouble was due to poor blood, but his medicine did not help me. My face was sallow, my lips bloodless and at the least exertion my heart would palpitate so violently that I would have to lie down. My feet and legs would swell and cramp, and all my friends thought I was in a decline. In this condition I was urged by a friend to try Dr. Williams' Pink Pills. I got three boxes, and to my delight, by the time I had used them I began to feel better. I got a further supply and kept on taking them. Daily I felt myself growing stronger. The color returned to my cheeks and lips and I felt a new interest in life. To sum up I can now say that I am feeling fine, for which I give the credit to Dr. Williams' Pink Pills, which I strongly recommend to all weak girls and women."

A useful book, "Building Up the Blood," will be sent free on request by the Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50¢. Try them today.

Where Nobody Is Young

Nobody is young in the little village of Burlington, Hampshire. The inhabitants boast that their aggregate age, in proportion to the population, is the highest in the country. There are twenty-seven old folk whose years total 2,115—an average of seventy-eight each. Once Burlington was a thriving community, but now strawberry growing is the only industry. All the young people have left for more fruitful fields.

A Power Of Its Own. — Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this. It is a power by which the most valuable liniment available for its uses is innumerable and for many years has been pronounced the leading liniment for aches and pains.

Italy has forbidden the exhibition in any part of the kingdom of films depicting war episodes.

Use Minard's Liniment for the Flu.

W. N. U. 4775

Papered With Postage Stamps

In Near Bognor, England, Is Known As Stamp House

Near Bognor, where the King has been removed for his convalescence, there is an inn known as Stamp House. Its walls and ceilings are completely papered with old postage stamps, and festoons of them are looped from one side of a room to the other. The "collection" was started many years ago by a former host of the place, who had a passion for stamps, and papered his first room with them. It is believed as a result of a wager. Under the mellow varnish there must now be hundreds of thousands; and report has it that many in semi-hidden corners are rare and valuable.

BABY NOT GAINING? LOOK TO HIS DIGESTION

Babies can't gain when nursing waste in a clogged digestive tract is forming gas, making them colicky, constipated and miserable. Just try Thomas' Digestive Balm. It softens mothers know, and see how your baby improves. A few drops of pure vegetable—barmless—Fitch's Castoria makes the most fretful, feverish baby or child comfortable in a jiffy. A few drops and he's digesting properly and gaining as he should. To get genuine Castoria, look for the Fletcher signature on the wrapper.

Recipes For This Week

(By Betty Barclay)

NEW YORK SALAD

- 4 slices pineapple.
- ½ cup celery.
- ½ cup nuts chopped.
- 2 oranges.
- Cream mayonnaise.
- Lettuce.

Arrange slices of pineapple on nests of lettuce leaves. Cut celery in slender strips, one and one-half inch long, and mix with nut meats. Pile in centre of pineapple, and garnish with four sections of orange, free from membrane, laid symmetrically on pineapple. Pass dressing separately.

BOILED CAKE FROSTING

- 1 cup sugar.
 - ½ cup orange juice.
 - Grated rind of one orange.
 - 1 egg white.
- In a smooth glass saucepan put sugar, orange juice and rind, mix well, and boil, being careful not to stir or disturb syrup until it will spin a long thread when it drops from the tip of spoon. Lift gently from fire, and pour slowly, while beating vigorously with a strong egg-beater, in a fine stream onto egg white which has been beaten until light but not stiff. Continue beating until frosting is stiff enough to stay in place, pour all at once onto cake and spread over surface with a few movements of a large, flat knife.

Minard's Liniment prevents Flu.

Standards Of Greatness

Wealth Or Titles To Judge Of An Individual's Pre-Eminence

The mind of the average American is a curious mixture of materialism and sentiment, and we must bear those qualities in mind when we criticize him. He has a great big heart and a keen eye for the almighty dollar, which is, for him, to all intents and purposes, the mark and emblem of a man's success in life. Here, in Great Britain, titles, honors, orders and decorations are the rewards for pre-eminence. In America there is no "honors list." The only list that counts is the yearly statement of income tax paid by every citizen and published far and wide so that all can see how a man has risen above his fellows. No wonder, therefore, that everyone strives unceasingly to get rich—Sir George Armstrong in The Lone Observer.

Strain Of City Life

The stress of living in the cities is today a more potent factor in causing insanity than the loneliness of the isolated farm and settlement on which emphasis has been so frequently laid in the past in Canada, according to Dr. W. M. English, medical superintendent of the Ontario Hospital, Brockville, with over 600 patients. On the other hand, telephones, motorcars and radios have broken down the isolation of the farmer and settler and insanity through loneliness is no longer found in the degree formerly known.

Swing Of High Buildings

The Eiffel Tower (984 feet) swings as much as three feet in a heavy gale; but the Woolworth Building (792 feet) and other tall skyscrapers swing more than one and a half inches in high winds.

Just Right for This Weather

High in calories and warming carbohydrates—No fuss or bother—just warm in oven and serve with hot milk

Made By The Canadian Shredded Wheat Company, Ltd.

Need New Terminal Station

Frederick Palmer Recommends New Station At Montreal For C.N.R.

It is absolutely necessary to provide suitable passenger station accommodation for the Canadian National Railways at Montreal, says Frederick Palmer, the well known British railway terminal expert, whose services were retained by the government to study the matter of furnishing the eastern metropolises with more commodious terminal facilities for the Canadian National Railways and at the same time survey the possibility of a joint station for the C.N.R. and the C.P.R. Mr. Palmer's report to the minister of railways was made public.

Heavy Oil Production

Growing Importance Of Alberta's Oil and Gas Fields

The steadily growing importance of Alberta's oil and gas fields is shown in recently published figures. The production of Alberta wells for 1928, is placed at 489,531 barrels as compared with 321,154 barrels in 1927. Of the 1928 production the Turner Valley field, in Southern Alberta, contributed 410,623 barrels of naphtha, and 70,734 barrels of crude oil, the remaining 8,174 barrels coming from the Lacombe field. The total production of natural gas for the province in 1928 is placed at 14,188,899 million cubic feet as compared with 12,933,801 million cubic feet in the previous year.

Fishing With Power

Electricity has voided the use of fishing nets in many parts of Germany. Two copper cables, placed one on top and one below the water, are charged with electricity. Fish in the vicinity are electrified and come to the surface where they are gathered by these modern fishermen.

The Value Of Birds

Only Protection Country Has Against Insect Enemies

It is estimated that 10,000 caterpillars could destroy every blade of grass on one acre of cultivated land. An insect-infested tree may contain 12,000,000 aphids. The bird population of the country has been estimated at from 700 to 1,000 per square mile, and these birds, few enough in number, are our best protection against the insect enemies which they were intended to destroy. The man who kills these insectivorous birds is helping to destroy his own country.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Expeller, an excellent remedy.

There are places in India where there are about 600 inches of rain in some years.

FLU

Claims Many Victims in Canada and should be guarded against

Minard's Liniment

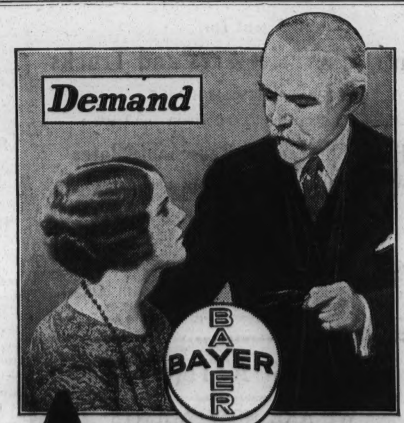

Is a Great Preventative, being one of the oldest remedies used. Minard's Liniment has relieved thousands of cases of Grippe, Bronchitis, Sore Throat, Asthma and similar diseases. It is an Enemy to Germs. Thousands of bottles being used every day. For sale by all druggists and general dealers.

Minard's Liniment Co., Ltd., Vermont, N.B.

The family album is coming back. It is reported, but its companion, the jet that could be turned down low, has departed forever.

Near Cardiff, Wales, road repairers have placed a sign reading: "A car on the road is worth two in the ditch."

There are 209 rooms in Buckingham Palace.

Demand

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it's not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—gently proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer Manufacture, to secure the public against imitations, the Tablets will be supplied with their "Bayer Cross" trademark.

German Aerial Expedition Will Again Attempt Conquest Of the Arctic This Spring

The conquest of the Arctic will again be attempted this spring. Plans for a circuit of the Arctic regions by the German airship LZ-127 have been revealed by Capt. W. Bruns, a German member of the "Aero Arctic," an international scientific organization, who visited officials of the Interior Department seeking their co-operation.

The expedition will be undertaken within the next few months, when the sun in the far north will shine 24 hours a day and the expansion of the gas in the airship will be obviated.

The airship is being lent by the German government, while the Russian government, by erecting a mooring mast at Leningrad, is giving assistance.

An effort will be made to map certain regions in the north. Observations will be made of sea depths and weather conditions.

The "Aero Arctic" foresees the possibility of regular air routes being established between points in the Arctic circle. Another suggested is Yokohama and Vancouver, by way of the Aleutian Islands.

The airship will start from Leningrad, thence to Kolan, on the Murmansk coast, to Franz Joseph Land, across the Canadian sector to Nome, Alaska, where it will be re-provisioned, thence to Wrangel Island finally over the Polar basin.

Officials of the Interior Department are considering the possibility of sending a Canadian scientist on the expedition.

School Attendance

2,291,720 Students Are Enrolled in Educational Institutions Of Canada

The number of students enrolled in the educational institutions of Canada was, according to the latest survey, 2,291,720. These included 2,022,720 in ordinary publicly controlled day schools, 102,068 in technical and evening schools, most of them under public control; 71,468 in private or independent schools; 42,546 in universities and colleges; 3,580 in preparatory courses, or schools affiliated to universities and colleges, in addition to those in private schools. The remainder were in business colleges, normal schools and other scholastic institutions.

The educational standing of the enrolment was 1,932,903 in elementary grades, and 300,140 in secondary or higher grades. These do not include the greater part of night school pupils.

The expenditure on public education during the year 1926-27 is given as \$125,570,375.

Fox Ranching Problems

Fox raisers and particularly beginners would do well to secure from the Publications Branch of the Department of Agriculture, at Ottawa, a copy of the first report of the Experimental Fox Ranch that has been operated in Prince Edward Island during the past three years. The ranch as described in the report is a model that might safely be followed.

Problems of exercising, feeding, treatment for parasites and health are dealt with in a helpful way.

Cable Used During War

The post office cable from Peterhead to Russia, which was of great service during the War, has been dismantled. At one time a staff of forty-five was employed in handling messages at the Peterhead end of the cable, but this number gradually dwindled as the service fell into disuse.

Making a fool of a man is one job woman can beat nature at.

"Are you mad? Haven't we your mother with us?"—Moustique, Charlel.

Unearthed Evidence Of Mighty Battle

Last Stand Of Prehistoric Giant

Against Buffalo Found In Africa

Harking back into primordial existence on the Dark Continent, road makers working in a quarry at Springbok Flats, north of Pretoria, South Africa, unearthed evidence of a mighty battle in the dim past between an extinct species of giant buffalo and a powerful, giant-like primitive man. Indications from the shattered bones of man and beast which were found lying close together in the same stratum were that the man had been trampled to death by the buffalo in some remote age.

Most of the man's skull, a majority of the longer bones and parts of the hands have been recovered. The buffalo's remains also indicate that he died a swift and violent death, probably due to injuries inflicted on him by the man. The Johannesburg Museum director believes that the hunter and the hunted died almost simultaneously.

The man is officially described as "a powerful, large-sized man not closely related to any of the Negro races." The size of the buffalo, as estimated by measuring between the tips of the horns, must have exceeded that of the largest known African species.

Dashingly New

Smart, side-closing coat dress with fluttering plaits across front of skirt that accent youth of wearer. It affects swagueness through the hips through long-waisted bodice that serves as a hipknot. The dart-fitted sleeves, forming tab extensions, button-trimmed, are a new style note. The one-piece collar is especially becoming. For immediate all-around wear, it is very smart made of printed rayon velvet as illustrated with collar and belt of fallie silk. Style No. 350 is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, and 42 inches bust. Feather-weight tweed, cashmere, wool jersey, silk crepe, wool crepe and crepe satin are also suitable. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that when you send are also suitable. Pattern price 25 additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery, etc.

Cash Bonus For Farmers

Large Sum Is Distributed By Saskatchewan Wheat Pool Elevators, Ltd.

Cheques to the total amount of \$1,650,791 were recently distributed to members of the Saskatchewan Wheat Pool Elevators, Ltd., all of whom are farmers. These cheques represented the surplus earnings of the Saskatchewan Pool Elevator system for the crop year 1927-28. At the annual meeting of Saskatchewan Wheat Pool delegates held in Regina last November, it was decided that these be distributed to the members in cash. The payment is being made on the basis of 1% cents per bushel for grain delivered through Pool country elevators and one cent per bushel for grain delivered to Pool terminals over the platform.

This is the third payment in cash covering the excess charges refund which has been made to Pool members. The amount of the surplus earnings of Saskatchewan Pool Elevators, Ltd., during 1927-28 was returned to growers in February 1927, and amounted to \$476,000. This figure jumped to \$1,372,000 for 1926-27, and for 1927-28 to \$1,430,791.06, the amount recently distributed.

Money Needed For Montreal Harbor

Intimated That H.B. Line May Curtail Business At Eastern Port

A bill to authorize a loan of \$10,000,000 to the harbor commissioners of Montreal for extension of harbor facilities, received first reading in the House of Commons, Hon. P. J. A. Cardin, minister of marine and fisheries, explained the money was not a gift, but was a loan.

Hon. R. B. Bennett, Conservative leader, drew attention to the possibility of a curtailment of business at Montreal on account of the construction of the Hudson Bay railway. The proposed extension of the line to Winnipeg indicated that some of the business would hereafter go in that direction. Mr. Bennett stated that further discussion would be had on second reading.

January Immigration Figures

Return Movement To Canada From United States Is Noted

Immigration to Canada during January amounted to 4,164, an increase of 13 per cent. over January a year ago. British immigration for the month increased from 771 to 1,133, immigration from the United States increased from 1,223 to 1,573, immigration from other countries decreased from 1,098 to 1,458.

The return movement to the Dominion of Canadians who had gone to the United States intending to live there and who came back declaring their intention of remaining permanently in Canada, amounted during January to 1,767. These are not included in the immigration returns.

At the next World's Poultry Congress, to be held at the Crystal Palace, London, England, in July 1930, it is anticipated that Canada will exhibit about 1,000 live birds. In addition the Dominion will have an educational exhibit.

The cost of the World War has been fixed by a League of Nations committee at \$362,500,000,000 (\$72,500,000,000).

Alberta School System

Total School Enrolment Is Given As 160,000

Alberta's total school enrolment is approximately 160,000.

A greater percentage of increase occurred last year in high school than in public school enrolment.

The per capita cost of education for all schools in the province has remained practically stationary.

The foregoing information is contained in the annual report of the department of education, tabled in the legislature by Hon. Perren Baker, minister of education.

Where the total enrolment in the schools of the province increased by 4,706 in 1928, approximately 37 per cent. of this number is to be found in the high schools. In 1906 the percentage of the entire enrolment in the high school grades was 2.41 in comparison with 11.44.

During the year 56 new school districts were organized. Of these 33 are north of township 53, and 17 south. The total enrolment in the number of districts in the province now stands 3,497. There are, however, a total of 5,148 departments in regular operation. Eighty-one new one-room schools were built and 13 new two-room schools. This is all exclusive of the building taking place in the towns and cities.

There has been an increased demand for technical education throughout the province.

More than 1,000 more pupils wrote on the departmental examinations than ever before. In the high school grades 75.9 per cent. of all the units written were passed successfully, making an average of 75 per cent. or more on all units required for matriculation or normal entrance 149 pupils obtained honors.

New text books in agriculture for both elementary and secondary schools were introduced during the year, also a new system of writing manuals. The latter were prepared to accompany the Alberta curriculum in writing.

Approximately \$150,000 worth of business was done in the school book branch. Ninety-four per cent. of this business was done with firms located in Canada. The remaining six per cent. went to British and American firms.

Sea Power Is Essential

Great Britain Could Not Definitely Renounce Its Use

Unquestionably Great Britain, to reach friendly accord with the United States, would be prepared to go a long way in renouncing the use of naval power under certain conditions. It is absurd, however, to suggest, as the United States senate does officially suggest, that Great Britain and other maritime powers must renounce the use of sea power in any and all possible conditions. It is no reflection on the good faith of the United States to say that it is not the intention of the American navy would be useful in accordance with the terms of any such treaty.

John Decided It

The wife of a famous English Bishop—whom we shall call John Smith—was recently very ill, and required a serious operation. As she recovered from the anesthetic, she was heard to murmur: "Am I in Heaven? Am I in Heaven? No, there's John."

DOG SLED DERBY

Two "gentlemen drivers" are now entered for the Eastern International Dog Sled Derby. There was very little if any of commercialism connected heretofore, but the entry of the gentlemen drivers who race their own dogs for the love of the sport has given the event a much wider appeal. Famous dog mushers from the north with malamutes and huskies, will vie for honors with men whose dogs are bred for show points. The race goes to those with the greatest stamina. Run over a forty-mile course for each of three days, the derby is an endurance test for man and beast. And no whips are used. Arthur Heavals is seen above with one of the husky types. The other picture shows practically all that a musher sees during the race.

Close Kinship Between Life Of Plants and Animals Is Borne Out By Interesting Experiments

Airmen Are Modest

Fame and Notoriety Do Not Seem To Affect Them

Airmen of the first rank are shy birds, for in them modesty seems innate, and it is possibly quite true that none has ever boasted of his feats in the war or of his exploits in flying. Deeds have made them known, but it is not they who gush over them. Fame, and more of it, a welter of notoriety, has been thrust upon them; but from it they have emerged as they do from the clouds, unruffled, unaffected, reserved.

They may have flown the north Atlantic, as three did, from Dublin to Greenland Island, and be engaged in operations that would turn the heads of lesser kings. But when the noise subsides, and the glory they best know came so close to catastrophe, has gone down in the records of aeronautics, those fliers, like the host of their comrades in flight doing their jobs of work, retire into unostentatious privacy. Their names were in everyone's mouth; but in a few months, in a year, are difficult to recall; and they might not be remembered today had not one of the three, Baron von Huenefeld, at Berlin, with regrettable untimeliness, taken off on his flight in death.

It was as a passenger that Von Huenefeld joined in the north Atlantic flight, which he had made possible by expending on it all he possessed; but he was a pilot when he died, and in the last few months had flown a remarkable flight from Germany to Japan. He had joined the men who fly. Among combatants, they are apart; among civilians, they are alone. In war, as in peace, their code is exemplary in honor. It is the same for all nations, high as the ships their airmen fly. They will be wreathing laurels for Von Huenefeld. He would not ask more; for the spirit of him that has taken off will be borne to the aerodrome at which all airmen must land in time, so many so early.

Air Mail For The West

Understood That Post Office Department Will Resume Winnipeg-Calgary Service

While there is good reason to believe that the cabinet greatly reduced the amount of money sought by the post office department for the extension of air mail services in the Dominion, it is understood that it is the intention of the department to proceed with the Winnipeg-Calgary service as soon as the estimates are approved by parliament.

The total amount of the increased sought by the department for air mail services is said to have exceeded \$1,000,000 and this was reduced by the sub-committee of the cabinet which reviews the estimates before their presentation to parliament to \$800,000. This reduction will compel the post office officials to exercise the greatest care in preparing their plans and in negotiating air mail contracts with private aviation companies.

The cost of the Winnipeg-Calgary service was estimated at between \$450,000 and \$500,000, but the department is committed in other directions in regard to air mail services and as it now stands not more than \$400,000 of this amount will be available for this service across the prairies. Notwithstanding this unfavorable situation, however, the officials will proceed with plans and make every effort so to arrange the matter that a service will be begun, probably next autumn.

His Reminder

A K.C. strolling along a street one morning, came to a fishmonger's shop. He was fascinated by the dead, expressionless eyes of the fish on a slab in the window.

"Good lord," that reminds me," he said suddenly hurrying away. "I've got to address a special jury this afternoon."

A British scientist predicts that this time of year man will be born toothless. We thought, in our ignorance, that they usually were born that way.

No doubt there are linguists lexicographers who know the exact shades of difference between hokey, hokum, blah, baloney, applesauce and banana oil.

Blinks (waiting with friend): "Was your wife over on time?"

Jinks: "Well, once she sat on my watch."

That remarkable native Indian scientist, Sir Jagadis Chandra Bose, found out directly, and in a most eloquent and arresting support of the close kinship between the life histories of plants and animals and their reactions to external stimuli. He has mustered a vast amount of experimental data in defence of his theory and these have recently been reinforced by a series of interesting experiments conducted by the Boyce Thompson Institute of the United States into the reaction of vegetables to the influence of artificial light. The results indicate that vegetables are not illike, but possess distinct individualities of their own, indeed responding with marked differences that are not very far removed from human responses under corresponding treatment.

Take the radish as an example. No one, perhaps, ever suspected the radish of any great yearning after the thrills and excitements of night life. It has always seemed a sort of starchy vegetable, despite its pungent flavor and its preference for red as a color. But the latest reports that when the radish had its normal day extended by the concentration upon it of light designed to duplicate as far as possible the light of the sun, it perked up in surprising fashion. Indeed, it displayed a readiness to enjoy the longer hours that would have done credit to regular cabaret patrons.

Even more surprising, however, was the fact that the radish, when no vegetable we know could wear an external aspect more conventionally respectable. Though a point arrived where the radish showed signs of getting tired, and of wishing that somebody would put out the light and let it go to bed, not so the lettuce. It, apparently, was prepared to stay up all night. After a straight twenty-four hours of light it was still fresh. This just goes to show that you never can tell. That may be a somewhat broad conclusion, but it is further borne out by the juicy and roid tomato. Here is a vegetable concerning whose sedateness and respectability not even the most suspicious observer has entertained question, even if ripe tomatoes have on occasions been involved in riotous happenings. But if the Institute's reports are correct, we have done it an injustice in suspecting it. After an extra hour under the stimulus of the bright lights the tomato showed signs of extreme weariness, we are told. Another half hour and it began to wilt. In kindness the lights had to be extinguished before a second hour had elapsed.

The tomato evidently knows when it has had enough. Let the radish and the lettuce turn night into day if they like, but none of this night stuff for the tomato. It prefers regular hours. Early to bed and early to rise is its motto. It sets an example of the simple, quiet and fruitful life to its neighbors of the vegetable garden.

Could Not Hold It

The stationmaster rushed out of his room after hearing a crash on the platform. He discerned a disheveled young man sprawled out perfectly flat among a confusion of overturned milk cans and the scattered contents of his traveling bag.

"Was he trying to catch the train?" the stationmaster asked of a small boy who stood by admiring the scene.

"He did catch it," said the boy, "but it got away again."

"The Geographical society says explorers should be bachelors."

"But what would keep them abroad?"

Pratt: "I understand Chicago has adopted a flower as a civic emblem." Simpson: "Yes? What is it?" Pratt: "Crocus."

"I am a commercial traveller in insect powder." "That is very nice, but here we crush them between our thumbs." — Pages Gales, Yverdon.

THE finest, most distinguished looking farms and ranches in Western Canada are protected by Frost's fence that looks its quality! It will make your farm look its best! There is only one way Frost Fence can stand when properly erected, and that is straight and true. The tight lock HOLLDS under the severest strains. Frost made wire and extra galvanizing defers rust. WORLD HAPPENINGS BRIEFLY TOLD

Vancouver, B.C., is under serious consideration as the site for the next \$50,000 Wrigley marathon swim. Elwood Hughes, director of the event has announced.

The Daily Mail, London, Eng., says the Czech-Slovakian minister of the interior has refused Leon Trotsky a passport visa to permit him to enter that country.

Reports from apparently well-informed quarters in Canton, said the Canton government expects the Nationalist government at Nanking soon to launch a military campaign against it.

The addition of the lash to penalties for trafficking in drugs was approved by the special committee of the House of Commons, which is considering amendments to the Opium and Narcotic Drugs Act.

Approximately 25,000 bushels of seed have been graded and sealed under registered grades since the Dominion seed branch of the Department of Agriculture started operations in Saskatoon at the beginning of the year.

"The recommendations of the Imperial wireless and cable conference, 1928, have been in general accepted by the governments concerned, including the government of Canada," Hon. P. J. Veniot, postmaster-general, stated in the House of Commons.

The Toronto city council has authorized the board of control to call for designs for a memorial to Sir Adam Beck. The memorial is to sit at more than \$25,000, and its main feature is to be a bronze statue of Sir Adam. The monument will be erected on University Avenue, Toronto.

Nobody ever has to take a tonic to create an appetite for flattery.

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vancouver, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—Mrs. MILTON McMILLAN, Vancouver, Ontario.

Britain's Wheat Market Valuable To Canada

Interesting Facts Brought Out In Report Published From Ottawa

The market in Great Britain is worth twice as much to the Canadian wheat grower as the markets of all the rest of the world taken together. That is a fact that stands out in a report published from Ottawa giving the export figures for the present crop year up to date. Putting it another way, if all other countries barred our wheat by excluding tariffs, the Canadian farmer could still find a market for two-thirds the amount of wheat he now produces—in Great Britain. Or, if Britain barred our wheat, we would have to find buyers elsewhere for three times the amount of wheat we are able to sell in other countries at present.

Canadian wheat—and every other Canadian product—has a preference in Great Britain. The proof is that no other importing country in Europe admits our wheat on the same favorable terms. Should Britain ever adopt a tariff, there is no doubt whatever that Canadian wheat would be admitted on the most favorable conditions granted to any wheat-growing country. A tariff is being actually proposed there in order that a financial preference could be given to Canadian wheat. The British market is the permanent outlet for Canada's surplus wheat crop, incomparably the largest outlet there is, and the largest there is likely to be. That is a fact which Canadians ought to keep in mind when they think of international trade—and when they are thinking of buying imported goods.—Edmonton Bulletin.

Heart Trouble Hands and Feet Numb and Cold

Mrs. Wm. Fowler, Auburn, Ont., writes: "Several years ago I was troubled with my heart and nerves, so bad, at times, my hands would become numb and cold. I tried doctor's medicine, for a while, but it did me little or no good. I happened to see

advertised and started taking them at once, and continued for some time, and now then I have no return of my trouble." Price 50c. a box at all druggists and dealers or direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Drigible Flight Delayed

Giant British Craft Not Making Trip To Canada Until July

The flight of the dirigible R-100 from England to Canada will probably be made towards the end of July. It was learned at the department of national defence. It had been set for the end of May, but technical improvements to the craft are being made which will necessitate delay. Officials of the department regard the flight as one of the most important steps in inter-empire communication so far attempted. Possibility of a route to Australia across Canada is not considered beyond the bounds of possibility.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

What "It" Is

Perhaps this can be applied generally to all husbands, but a woman in the Wilkeson police court recently defined the word "It" as used by a famous woman novelist. The clerk pointed to a man in court and said "Is that your husband?" She replied, "Yes, sir, that's it."

A philosopher is a man who never feels badly after he has made an ass of himself.

INDIGESTION RELIEVED QUICKLY

The best Vegetable aids nature as a laxative in its digestive duties. Often one of these little pills taken after meals or at bedtime will do wonders, especially when you have overindulged or are troubled with constipation. Remember they are Dr. Carter's formula, young and old can take them. All Druggists 25c and 50c red pkg. **CARTER'S LITTLE PILLS**

THE EASY WAY

Thousands need cod-liver oil to increase vitality and build up resistance.

Scott's Emulsion

Is the easy and pleasant way to exact the most out of cod-liver oil to reinforce your body with strength to build resistance.

SUNDAY SCHOOL LESSON

MARCH 10

BAPTISM AND THE LORD'S SUPPER

Golden Text: "This do in remembrance of Me."—1 Corinthians 11:24. Lesson: Matthew 3:13-17; 28:19; 20: Acts 2:38; 4:1; Romans 6:1-14; 1 Corinthians 11:23-26. Devotional Reading: Revelation 7: 9-17.

Explanations and Comments

Christ's Commission To Baptize All the Nations, Matthew 28:19, 20.—Upon a mountain in Galilee after the resurrection of Jesus, the eleven disciples saw Him and worshipped Him. He told them of His universal mission ("All authority has been given me in heaven and on earth"), and gave them His world-wide commission to make His power a reality: "Go ye therefore, and make disciples of all nations."

"Remember, fellow Christians, how wide was the horizon of Jesus. Our horizon widens from cradle to home, school, city, country, and with some, perhaps, to the last man. But to Jesus the outside rim of the earth was the true horizon. He saw, and the last. When He was born, good tidings came unto whomsoever would believe. 'Unto all people among all nations,' throughout the whole world; 'to every creature'; 'to all that breathe.' It is (5) into the name of the Father, and of the Son, and of the Holy Spirit. We give ourselves to His guidance, as our Sanctifier, Teacher, Guide and Comforter."

Jesus directed His followers to baptize disciples into the name of the Father, and of the Son, and of the Holy Spirit; teaching them to observe all things whatsoever He commanded them. "Baptism is (1) into the name of the Father, as our Creator, Preserver, and Sanctifier, who rules us, as free agents, by His love. It is (2) into the name of the Son; in baptism we accept, as Peter did, 'Thou art the Christ, the Son of the living God,' and consent, as Thomas did, 'My Lord, and my God.' We give ourselves to be taught, and saved, and ruled, by Christ. It is (3) into the name of the Holy Spirit. We give ourselves to His guidance, as our Sanctifier, Teacher, Guide and Comforter."

And then Jesus gave His wonderful words of comfort and encouragement and cheer: "Lo, I am with you always" (not will be, but am), "even unto the end of the world!" Our responsibility for missionary work is patent in the command of Christ; our power for that work is perfect in this great promise of Christ.

Success and Happiness

People Do Not Fail Entirely Who Never Reached Goal

Mr. Edison, on his eighty-second birthday, told a number of assembled newspapermen that he was not acquainted with anyone who was happy. There is no reason to suppose that Mr. Edison was jesting, and it would be an impertinence to suggest that he doubted his own happiness. But if by "happiness" he means what tens of thousands of his fellow men mean—the satisfaction of having tried hard and won—Mr. Edison is clearly stretching a point, since in that case he himself should be one of the happiest of men. He has gone from victory to victory in the world of scientific invention and he will leave an undying name behind him. In some few things he may not, in his own opinion, have succeeded; but this is not to say that he failed. You do not necessarily fail entirely because you do not wholly succeed; and Thomas A. Edison has been a very notable success.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

The Good Old Days

Maybe two can live cheaper than one, after all. Mr. and Mrs. Tom Lovelock, of Lynnhaven, England, in celebrating their golden wedding anniversary, revealed that they were married when Lovelock was making but \$2.50 a week and that shortly after his salary was reduced to \$2.25.

Scientists say life evolved in a series of jumps, and a cursory inspection of our thoroughfares convinces us it is still evolving that way.

Mimard's Liniment for Coughs and Colds.

Want Rail Deal Approved

Agreement Between Railways and Province Of Alberta Up For Ratification

Approval of the agreement between the C.N.R., the C.P.R. and the Province of Alberta, for the purchase of the undertakings of the Edmonton, Dunvegan and British Columbia railways; the Central Canada Railway Company; the Central Canada Express Company; the Alberta Great Waterways Company, is sought in a resolution placed on the order paper of the House of Commons, by Hon. C. A. Dunning, Minister of Railways and Canals.

The resolution seeks further authority: "To incorporate the Northern Alberta Railways Company, in which are to be vested the said jointly acquired railways; "To authorize the Governor-in-Council to guarantee the principal and interest of the securities to be issued by the Canadian National Railway Company, to an amount of amounts fixed from time to time by the Governor-in-Council for the payment of one-half the purchase, and one-half the obligations assumed under the said agreement."

The Explanation

"I bought a new car and gave up my piano-player as first payment." "I didn't know they accepted piano-players as payment on new cars."

"They don't usually, but the salesman is a neighbor of mine."

Mother (giving afternoon tea instructions): "Now, remember, Willie, when these cakes are handed round you must take a plain bun from the bottom of the dish."

Willie (disgustedly): "Just my luck! The bargain basement again!"

"Dick is all right if you know how to take him."

"I hate these people who have to be labelled like a bottle of medicine."

Your food doesn't do you any good if you're tired

At the end of a day's work, relieve nervous tension before eating. Wrigley's chewing gum, used up—so that you're ready to enjoy your food.

Then, after meals, Wrigley's helps digestion, cleanses the throat, removes all traces of eating or smoking—sweetens the breath.

WRIGLEY'S

Reward Wheat

Is Gaining In Favor In Some Sections Of Manitoba

Reward wheat continues to look promising and in some sections of Manitoba may prove more desirable than Durum, in the opinion of H. H. Newman, Dominion cerealist, who met provincial agriculturists interested in the selection of approved varieties of wheat; the object being to reduce the number of varieties to those of demonstrated superiority.

There are 10,000,000 accidents in the United States each year.

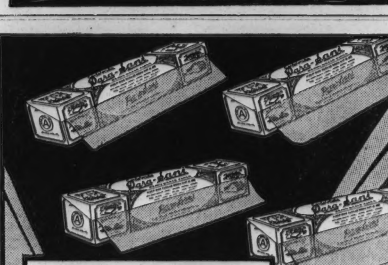

You Can't Dye a Dress with Promises!

You can't dye a dress—no matter how careful you may be—without real color. That's the idea behind Diamond Dyes. They are made to give you real service. They contain from three to five times more aniline than other dyes on the market.

Next time you want to dye, try Diamond Dyes. See how easy it is to use them. Then compare results. Note the absence of that red-dyed look of streaking or spotting. See how soft, bright, new-looking the colors are. Then observe how they keep their brilliance through wear and washing. If you don't agree Diamond Dyes are better dyes, your dealer will refund your money.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye of tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue packages are silk or wool only. The white package will dye every kind of goods, including silk and wool.

Name Town

Rebel Forces In Mexico Are In Revolt On Three Sides Of Capital City

Mexico City.—Revolution flamed on three sides of the capital recently. The state of Vera Cruz was almost entirely held by rebels, the Isthmus of Tehuantepec, to the south, was reported in their hands, and another group had taken the northern border state of Sonora without bloodshed.

General Jesus Maria Aguirre's seizure of Vera Cruz cut the capital off from the Gulf of Mexico to the east. The holding of the Isthmus would be of small value to the revolutionaries unless they possess the Pacific port of Salina Cruz. Possession of Sonora gave them control of the northern end of one of three main railroad routes from the United States.

Eight states are involved in the revolution, leaders of the movement here said. The states included are: Vera Cruz, Chihuahua, Durango, Sonora, Yaguarit, Jalisco, Coahuila and Sinaloa.

General Plutarco Elias Calles, of Mexico, was named secretary of war by President Emilio Portes Gil. He immediately assumed his duties, replacing General Joaquin Amaro, who has been in a hospital after an operation on his eye. General Calles will take active charge of the Mexican army.

Provisional President Emilio Portes Gil summoned a cabinet session at his palace, of the supreme war council and the cabinet. Former President Plutarco Elias Calles joined the conference to lend his strong hand to federal defence. Governor Aaron Saenz was another strong political leader who rallied to the president.

Pioneer Lake Captain Dead

John Cousens Saw First Steamship To Sail Lake Superior

Port Arthur, Ont.—Marine Captain John Cousens is dead here aged 82 years. At Sault Ste. Marie he saw the passing of the Rescue, the first steamship to sail Lake Superior. He sailed on the Chicora, famous blockade runner.

In 1871 before the advent of the Canadian Pacific Railway, he carried mail over the ice route between Duluth and Port Arthur. He served with the Queen's Own in the Fenian Raid and was one of the guard of honor at the reading of the proclamation of Confederation in Toronto in 1867. Later he served with Wolseley in the Northwest.

Women Refused Franchise

Quebec.—By a vote of 50 to 16, the Quebec legislative assembly killed the bill introduced by William Tremblay, Conservative M.L.A., for Maisonneuve, to give the women of Quebec the vote in provincial elections. This is a gain of five votes for the cause of suffrage as compared with last year.

Has Had Effect

Ottawa.—Amendments to the Opium and Narcotic Drug Act, to provide for the deportation of aliens convicted of trafficking have had a salutary effect. Convictions have dropped from 1,349 in 1922, to 343 last year.

Both Railway Companies Are Claiming Priority Construction Rights

Ottawa.—The bone of contention between the Canadian National Railways and the Canadian Pacific Railway, with regard to the branch line program, came up before the parliamentary committee on railways and canals. Except for one area, an agreement has been reached between the two companies in connection with their program. The sole exception is the line projected between Melfort and Aberdeen, in Saskatchewan, to which both companies claim priority construction rights.

Sir Henry Thornton, president of the National Systems, told the committee that the Government owned road claimed this territory by virtue of the fact that 12 years ago, the old Canadian Northern had already started building there, and had already graded 19 miles of the 47 mile project. Four years ago, this line had been one which had been presented to the Government in the company's

Famous Flyer In Accident

Col. Lindberg and His Fiancee, Miss Morrow, Meet With Mishap

Mexico City.—Colonel Charles A. Lindbergh's flying skill saved the life of his fiancée, Miss Anne Morrow, when their plane capsized on landing at Valbeta Field.

The colonel is confined to bed in the American embassy residence with what embassy attaches describe as a "slightly dislocated shoulder blade." Miss Morrow was badly frightened, but not injured.

Colonel Lindbergh was returning from an air trip of several hours with the girl whom he will marry. The aeroplane, a four-passenger monoplane named the "City of Wichita," had been crippled by the loss of a landing wheel and the colonel faced a situation of unusual danger with the chances favoring a crash.

He brought the plane safely to earth and taxied for thirty yards on one wheel with the axle of the missing wheel dragging on the ground. Suddenly the plane pitched forward and turned completely over.

Later, Colonel Lindbergh declared "this is nothing at all. It is not an accident; it is simply a mishap."

Died In Geneva

New York.—Frederick M. Harris, editor-in-chief of the publications of the Young Men's Christian Association, died in Geneva where he had gone last October for medical treatment, according to word received here by his associates.

Grant Hall Received By Pope

Rome.—Pope Pius granted an audience to Grant Hall, vice-president of the Canadian Pacific Railway, who is visiting in Rome.

Westminster Glee Singers

Famous Organization Making Tour Of West Coast Canada

Outstanding among the musical events of the present winter, is the visit of the Westminster Glee Singers, who are at present touring Western Canada. The excellence of this traditional group of singers is known throughout the Empire, and music lovers of the Canadian West are greeting with delight the appearance of these famous entertainers, seven of whom are boy contraltos. The program includes a charming arrangement of madrigals, plantation songs, folk songs, sailor chants and sacred selections. Following is the balance of the itinerary arranged for them in Western Canada.

Prince Albert, March 8 and 9; Saskatoon, March 11, 12 and 13; North Battleford, March 14; Vermilion, March 15; Vegreville, March 16; Olds, March 18; Ponoka, March 19; Red Deer, March 20; Edmonton, March 21, 22, 23; Calgary, March 25, 26, 27; Lethbridge, March 29, 30; Medicine Hat, April 1 and 2; Macleod, April 8; Coleman, April 9; Perdue, April 10; Cranbrook, April 11; Nelson, April 13; Penikese, April 15; Kelowna, April 16; Vernon, April 17; Kamloops, April 18; Chilliwack, April 19; Vancouver week commencing April 22nd.

Dynamite Plot Failed

Explosive In Found In Office Of Premier Taschereau, Of Quebec

Quebec.—Questioned as to a rumor that an attempt had been made on his life, Premier Taschereau stated that when he went to his office in the parliament buildings at 10:45 p.m. he found a stick of dynamite on the floor with a half-burned fuse attached. The fuse had been extinguished by some agency after burning a few inches.

Premier Taschereau had been attending a committee meeting in the parliament buildings and at its conclusion returned to his office.

Switching on the lights at once he noted the dynamite lying on the floor.

Premier Taschereau had the explosive removed by police and it was discovered to be dynamite of the most powerful type.

Purchase New Plane

Universal Airways, Limited, Order Another Machine For Use In Saskatchewan

Regina.—Speeding up their plans with the opening up of the weather, officials of the Universal Airways, Ltd., ordered for immediate delivery of a new cabin airplane for use in their proposed transport and express service in Saskatchewan.

The new machine will be capable of carrying four passengers or 500 pounds of freight. It will have a cruising radius of 550 miles and will be able to travel at a speed of 135 miles per hour when loaded. It will have a top speed of 150 miles an hour.

Company officials announced that it is proposed to order another machine within the next six or eight weeks. This machine would be the third of its kind purchased.

Plan New Airplane Plant

Will Be Built In Victoria According To Report

Victoria, B.C.—Negotiations are proceeding for the creation of an aircraft industry under the name of Yarrow Aircraft Corporation, Limited, involving a merger of the Dominion Airways, Limited, Vancouver, and the interests of Norman Yarrow, head of the Yarrow, Limited, Esquimalt ship repair works, according to rumors here.

While admitting the scheme is under consideration principals in the merger decline to discuss details of their plans.

Opera Star To Retire

Schuman-Heink Thinks It Time Professional Career Was Ended

New York.—Except for one more appearance, or possibly two, in opera here this season and some concerts in the West, Mme. Ernestine Schuman-Heink, called the greatest of all living contraltos, is to sing no more professionally, she announces. "After this season," she said, "I think it's time for an old lady to retire. I don't want to keep on singing when people say, 'Oh, I wish she would stop.'"

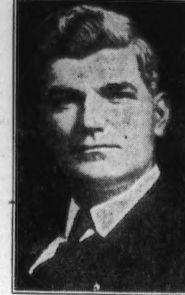

Radio Operator Has Travel Record

Trained operators in charge of radio-equipped cars in daily service on the Canadian National Railways travelled a total of 6,134,726 miles during 1928, and the most travelled operator during the twelve months was R. K. Anderson, who may well lay claim to a world's record for his performance. Mr. Anderson covered 153,000 miles on duty, a distance which represents the circumnavigation of the globe several times. This operator is usually on duty on board the International Limited, the fast daily train operating between Montreal and Chicago. Trains on eight runs on the National System carry radio equipped cars, the Canadian National Railways being the first in the world to offer radio as part of the service provided for passengers.

The illustration shows Mr. Anderson seated at the receiving apparatus in a library, compartment, observation car.

RECEIVES NEW APPOINTMENT

J. M. McKay, newly appointed General Agricultural Agent, Western Lines, Canadian Pacific Railway.

Application Is Dropped

Canadian Northeastern Not Building Railway Into Peace River Country

Victoria, B.C.—The Canadian Northeastern railway dropped its application for right to build into the Peace River country and will not conflict with any plans which may be made in that direction for the Pacific Great Eastern, the provincially-owned line. With its part of its original application dropped, approval of the private bills committee of the legislature was given to the company's request for right to build a line for 285 miles from Stewart, a tidewater port in northern British Columbia, to Fort Graham, in the central northern part of the province.

The Northeastern also dropped its request for right to build a branch up the Finlay river from Fort Graham for 100 miles, pending decision of the future of the government line.

New Reparations Plan

English Financial Expert Outlines Plan For Compromise

Paris.—A suggested revision of the Dawes plan for German reparations has been outlined by Sir Josiah Stamp, English financial expert, one of the international war debt referees now in session in Paris. His plan would afford a compromise between the maximum annuity which the German Republic would be willing to name and the minimum annuity which the Allied delegates would consider.

Piloted Two Zeppelins

Berlin.—Walter Scherz, a veteran helmsman of the air who stood at the wheel of two Zeppelins when they crossed the Atlantic to the United States, died here from balloon gas poisoning.

Will Appoint Commissioner

Ottawa.—A Canadian trade commissioner's office has been established at Panama, and a trade commissioner to the post will be appointed shortly.

Budget Surplus Of \$69,782,000 Estimated By Hon. J. A. Robb

Death Of Sir James Aikins

Former Lieutenant-Governor Of Manitoba Passes Away

Winnipeg.—Sir James Aikins, K.C., former lieutenant-governor of Manitoba, and a distinguished member of the Canadian bar, died early Friday morning.

Sir James who was in his 78th year, died at the residence of his son, Major H. Harold Aikins, shortly after midnight. He had been ill for a week, when he suffered a heart attack.

Sir James had a brilliant career in law, politics, the church and business, which won for him an international reputation. He was one of the founders of the Canadian Bar Association, and for many years was its president.

Cruiser Plan Satisfactory

Britain Has No Objection To U.S. Building Program

London, England.—Sir William Joynton-Hicks, the home secretary, told a conference of women Conservatives that the British Government had no objection whatever to the building of new cruisers by the United States.

"I cannot conceive that the American cruisers can ever be used except as an ally of Great Britain," he said. "I cannot conceive the possibility of the infinite stupidity of war between the great Anglo-Saxon nations of the world. We, therefore, are making no objections."

Forced To Swallow Knife

Toronto Thugs Use Inhuman Method On Victim

Toronto.—Angered at the small amount of money they found on his person, two thugs forced Angelo Augustus, 35, Toronto, to swallow a jack knife, more than four inches in length.

Angelo is now in hospital where doctors hope to save his life. According to the victim one of his assailants attempted to make him swallow the knife with the blade open but his accomplice interfered and the blade was closed.

Close Town Jail

Danville, Ill.—With the office of chief of police abandoned as unnecessary and the lock-up abandoned as a fire-trap, this town of 6,000 inhabitants is now depending on an honor system. Any arrested person faced the prospect of lodging in the village hotel at the city's expense.

Wheat Pool Now Making First Interim Payment On The 1928 Crop

Winnipeg.—An interim payment on the 1928 crop totalling more than \$26,000,000 is being distributed to Wheat Pool members of Western Canada, according to a statement by E. B. Ramsay, general manager of the Canadian Wheat Pool.

The payment is 12 cents per bushel on wheat grades one to five, and on flax and rye. Ten cents per bushel is being paid on number six wheat. Manitoba Pool members are receiving the sum of \$2,289,455.46 on deliveries of 18,408,000 bushels of wheat, and 703,760 bushels of flax and rye.

Members in Saskatchewan are receiving \$17,499,433.31 on 146,414,000 bushels of wheat, and 3,165,500 bushels of flax and rye.

The Alberta Pool payment of \$6,410,035.12 is on 53,000,000 bushels of wheat. The total amount distributed is \$26,188,923.92.

The payment made at this time is the first payment to be made on grain of the 1928 crop following the initial payment made at the time of delivery by the grower. In 1928 the first interim payment was dated March 9, but pool officials state that the date of the payment was advanced this year as much as possible in order to accommodate the thousands of pool members who have been hard hit financially as a result of the very disastrous frost which occurred on August 23, 1928, and

which was general over the three provinces.

The Saskatchewan crop was particularly damaged by this frost owing to the fact that there are so few districts in the province which were not affected to the extent of lowering the grade of the crop from two to four grades.

Commenting on this aspect of the 1928 crop, and on the payment now being made, A. J. McPhail, president of the Saskatchewan Wheat Pool said:

"Notwithstanding the relatively higher price for wheat which prevails now as compared with the heavy crop season of 1923-24 when the Alberta Pool alone was operating in Western Canada, and notwithstanding the exceptionally heavy crop harvested by Saskatchewan farmers in 1928, there is no question that the wheat grower has just cause to be greatly troubled over the financial returns from his efforts last year. By way of comparison it may be said that for the period of the crop year, August 1 to January 31, the grading of Saskatchewan Pool deliveries from the 1927 crop showed only 22.23 per cent. as falling into the grades from No. 4 to feed, while the corresponding figures from the crop of 1928 is 55.81 per cent. The cause of this greatly increased percentage of lower grades from the 1928 crop is the widespread frost which occurred in August, 1928.

Northern Mining Possibilities

Vast Mineral Development Foreseen In Northern Saskatchewan

The Toronto Star says: "Opening up a territory in northern Saskatchewan having vast mineral possibilities is foreseen by present activity. Efforts at Rottenstone Lake, Lac La Ronge, and other northern fields would seem to substantiate repeated claims that Saskatchewan was on the eve of a tremendous mining development. Large mining companies, together with the reported surveying of a railway line by the Canadian Pacific Railway, bring the country to the front."

"It is understood from best sources that negotiations are now under way which may lead to the formation of a 5,000,000 share subsidiary company by Manitoba Basin and the Lindsey enterprise (Ventures Limited). The details are now being completed, which would merge the claims of Manitoba Basin and those of Ventures, at Rottenstone Lake."

"The significance of this lies in the fact that the proposed subsidiary company will have a large acreage, one group laying directly south, another group directly north and northwest, of the Hudson Bay property where Consolidated Mining and Smelting Company is now operating."

"Of further interest in this merger of big interests, is the fact Ventures and Smelters are building an extensive copper refinery and electrolytic zinc plant. The two combinations together have what is regarded as the pivotal properties both in Saskatchewan and Manitoba."

Too Much Speed

Doing Everything In A Hurry Has Become A Habit With People

There is, says the Rev. Ward White, of Toronto, too much speed in the modern standard of living, and home life is suffering as a consequence. The reverend gentleman's charge is, unfortunately, one that cannot be denied. Evidence in support of it is abundant on every hand. People hurry over washing, shaving and dressing. They bolt their breakfast. They rush to the office. They tear around during business hours if their work takes them outside. They scramble for lunch. They leap toward the golf links, and, once there, they walk around the links at a pace that would make a dog hot. They drink speedily, they bolt their dinner, and they speed away once more to the club. And we endure it because we have no time in which to sit back and realize that we could do something very much better.

Very Absent Minded

It was pouring with rain, and as the drawing master had a long way to go to his school, he decided the money for the taxi could be well spent. Unfortunately, there was not a taxi in the station yard, and he had to be content with a cab.

"What's that?" he asked the driver, just as he was about to enter the vehicle.

The driver followed the direction of his fare's gaze and pointing finger.

"Why," he exclaimed, on turning round, "that's me 'orse, that is!"

"Oh, is it?" retorted the drawing master, who was inclined to be absent-minded. "Well, just rub it out and draw it again."

Mr. Townly—Have you started excavating on your new barn yet?

Farmer Silo—Partly. An airplane landed on the site last week and dug an excavation deep enough for three barns.

It was sixty years ago. He was on his knees. "Accept me," he pleaded, "or I shall die." She refused him and he died—last week.

"A pennyworth of insect powder."

"In a box."

"Not worth while—put it straight on me!"—Moustique, Charleroi.

W. N. U. 1778

Where Women Rule

Saskatchewan Egg Pool Directed Almost Entirely By Women

More men have not a monopoly of directing large and successful farmers' co-operative marketing organizations in Western Canada, where there are several such. Indeed they haven't! The Saskatchewan Egg and Poultry Producers, Ltd., with a total membership of over 19,000 and doing a gross annual turnover of approximately \$600,000, was organized by a number of farmers' wives less than three years ago. The first President was Mrs. John Holmes, of Asquith, Saskatchewan, and she still holds the office by popular choice. Only two of the six members of the Board of Directors are men. They were elected probably to prove that there is no sex superiority complex held by the overwhelmingly large number of women in the membership of the Pool.

The Saskatchewan Egg and Poultry Pool was organized because the farmers' wives regarded the system of individual selling as inefficient and under it the full measure of profits was not going to the producer.

A charge of \$2 is made to those joining the Pool, one dollar of which is an organization fee, the other dollar is for one share of stock in the Pool. Members contract to deliver all their marketable eggs and poultry as directed by the Pool. Initial privileges are made to producers on delivery, and the balance as soon as the products are sold and the overhead charges are determined. All profits go to the members.

Last year the Pool marketed 78,000,000 eggs and over half a million pounds of dressed poultry, most of which went to Eastern Canada and the United States.

Mrs. Holmes came to Western Canada in 1905, from the village of Otterton, Nottinghamshire, England, with her husband. They settled at Asquith, Sask., in 1907, where they still live. The head office of the Saskatchewan Egg and Poultry Pool is in Regina.

One-Passenger Taxicabs

One-passenger taxicabs are the latest thing in Constantinople, Turkey, according to recent cable dispatches. The men folk don't seem to mind so much, but the good ladies of the harem are objecting strenuously for two reasons. In the first place they must sit alongside the driver and in the second place Madame Fatima has no privacy whatever to enjoy her Turkish cigarettes.

Canada's Raw Pelt Production

The total number of pelts of all kinds produced in Canada in the year 1926-27 was 4,259,333 as compared with 3,686,148 in 1925-26. The increase in total number is due to an increase of 807,285 in the number of rabbit pelts, and of 60,654 in the number of squirrel pelts.

A Profitable Industry

Value Of Canada's Fisheries Runs Into Millions Yearly

A number of factors affecting the fishing industry of Canada have worked together to make 1928 the most generally profitable year since the war. Good weather during the season, heavy runs of fish, and profitable marketing conditions due to short catches elsewhere, produced a total yield estimated at \$50,000,000. The industry represents a capital investment of over \$50,000,000, and gives direct employment to approximately 80,000 people and, in addition, there is a reasonable number employed in boat-building, rope making and other subsidiary industries. Prosperity has been general throughout all divisions of the industry.

The value of the fish of various kinds taken from our inland waters amounts annually to about \$7,000,000, or approximately 15 per cent of the value of the total Canadian catch. The greater part of this yield comes from the Great Lakes, but fish to the value of \$1,600,000 are taken from the Prairie lakes. It is interesting to note that a catch of about 1,700,000 pounds is obtained annually from Lake Athabasca. The results of the operations of 1928 are not yet available, but it is estimated that the yield and value will be at least equal to the average of recent years.

Sulphur In Gases Valuable

Canadian Smelters Have Waste Of Fifteen Hundred Tons Daily

In a paper presented before a recent meeting of the Canadian Engineering Institute, W. H. DeChloris disclosed interesting statistics of the subject of sulphur contained in gases discharged in smelting plants of Canada. According to him fifteen hundred tons of sulphur are going to waste each day from Canadian smelters. The possibility of recovering a part of this for commercial use is of particular interest as the Dominion imports approximately two hundred thousand tons of sulphur, valued at about \$3,000,000 a year. The imported sulphur is used largely by the pulp and paper mills. It is now proposed to produce liquid sulphur dioxide at the smelters for use in the paper mills.

Steel With A Skin

Production of steel with a skin is announced by the Westinghouse Electric and Manufacturing Company, Pittsburgh. The skin is produced through a process called nitriding, by placing the steel in a box of ammonia gas at 1,000 degrees. This forms, says the announcer, "a thin skin extremely hard, quite tough and rust proof."

Aviation Progress

Tremendous Strides Made In Aviation In Canada During Recent Years

The tremendous strides which aviation has made during the past six years in Canada are shown today in figures compiled by the civil aviation branch of the department of national defence while in the same figures 1928 is displayed as a banner season.

The latest figures show that flying time in 1928 was about 40,000 hours, as against a total of 6,505 in 1920. Passenger mileage last year was about 3,000,000 miles, as against 22,464 in 1920.

During the nine years just past freight postage increased from 6,740 in 1920, to 2,500,000 in 1928. In 1920 there were no records of air postage; in 1928, some 1,221 pounds of mail were carried as compared with 284,163 last year.

Perseverance Will Win

Those Who Really Try Find Nothing Is Impossible

Perseverance will overcome all handicaps and it is therefore, one of the most useful human qualities. Never to give up, to go on and on trying and trying over and over again can have only one result—final success. It is harder for some to accomplish tasks than it is for others; but the brilliant ones, the well-equipped bodily and mentally, may be left far behind when it comes to a test. Never despair! The important thing is to fix the goal and work straight and constantly toward it. Nothing is impossible to the man who really tries. Failure comes from trying aside, surrendering to our weaknesses and allowing others to pass us on the road. Half the battle of life consists in perseverance; determination and a set purpose work wonders.

When People Walked

Many a man and woman in Michigan has walked five miles or so to school and puts a larger value on all education on that account. Twenty-mile walks to the nearest doctor were once common, and no doubt contributed to the recovery of the patient. A recent biography of an actor mentions a 32-mile hike to see his first circus.

Food Fishes More Important

Since its inception in Canada, fish cultural operations have been almost entirely confined to the more important fresh water and salt-water food fishes, but in recent years more attention has been given to the propagation of game fish, such as speckled trout in the east, and cut-throat and rainbow trout in the West.

Problem is to make money first and then make it last.

Key To Lasting Prosperity

Best Rules To Follow Are Suggested By Charles M. Schwab

Ten rules which seem to him to hold the key to lasting prosperity are suggested by Charles M. Schwab, chairman of the Board of Directors of the Bethlehem Steel Corporation. They are reprinted, as follows, from the New York Herald-Tribune:

1. Pay labor the highest possible wage. Prosperity is intimately related to a liberal wage scale.
2. Treat labor as a business partner. Successful industry depends more on human relations than upon the organization of money and machines.
3. Conduct business in the full light of day. Public confidence and public suspicion may be separated only by a door.
4. Remember that the law of supply and demand is inexorable. And it also would be well to remember that there is no necessity for producing an excess.
5. Live and help live. Even prosperous industries can not afford to have the backward industries too far behind the procession—prosperity, to be permanent, must be equally distributed.
6. Welcome new ideas. To establish permanent institutions we must always be prepared for a change.
7. Never be satisfied that what has been achieved is sufficient. Smugness and complacency do not promote progress.
8. Operate business on the most economical basis. Price-cutting, over-expansion, uneconomical methods of distribution are just as harmful to business and to the public as price-fixing, monopolies, and restraints.
9. Look ahead and think ahead. It is easier to avoid depressions than it is to cure them.
10. Smile, be cheerful, and work upon the basis that the fundamental purpose of business is to promote the happiness of human beings.

World's First Telegram

Was Written On Stone Thirteen Hundred Years Ago

What was probably the first form of "telegram" in the world was exhibited at the International Congress of Orientalists at Oxford.

It consists of a fragment of stone on which is a Coptic inscription, which translated means "He died today." This message was brought by "express" messenger to the friends of an unknown man 1,300 years ago.

The stone is exhibited in the exhibition of Oriental books and manuscripts opened in the Bodleian Library in connection with the congress. Among other exhibits is a collection of Indian playing cards with twelve cards of each suit, which were used in the sixteenth century. They are circular in shape and represent the signs of the Zodiac.

Canada Has Best Name

Other Countries Will Likely Adopt "Rayon" To Describe Artificial Silk

The French minister of commerce has declared his intention to make a study of the need to rename "artificial silk." So says a Paris cable, adding that the question has been discussed recently in the French senate. In Germany the new fibre and textile are called glassfloss, which means shiny stuff, or terms to that effect. Here on this continent, after rejecting a number of other proposals, the industry has become fairly well united in the use of "rayon." Britain still seems inclined to cling to "artificial silk," despite the opposition of the true silk industry, and also of the manufacturers themselves of the various cellulose fibers that approach in appearance the textiles made from the genuine wrappings of the silk worms.

In choosing "rayon," a word at once suggestive and harmonious, a sort of ray of light, a good French word was used. France could have adopted the term aptly. Apparently, however, she has not and is herself floundering about in search of something better. We doubt her ability to find a prettier expression or one that will be accepted more readily. The one assumption, however, is that the term "artificial silk" can not endure. Like synthetic beet-steak and manufactured eggs, the public will have none of such subterfuge names. France could do no better than to place her own approval on "rayon" and settle the matter for all time. If she does that even Germany will be forced into line, as the term glassfloss is distinctly not an international word.

Usually Needs Correcting

Person Who Looks For Errors In Pronunciation Is Always a Pest

Many a pompous paragon, dignified dandy and arrogant aristocrat, finds such a delight in correcting the mispronounced words of their friends and relatives that the latter meet them in fear and trembling.

The amusing thing about this is that in most cases the pompous, dignified and arrogant ones mispronounce many simple words themselves.

Quite frequently you will hear the word "Salmon" pronounced "Ball-mon." Really, the "t" is as silent as the "q" in horse-radish. Our friend the dictionary tells us that "Sam-on" is the real pronunciation.

We have exactly the chronic corrector of mispronounced words and you can easily locate a few errors as glaring as this. Correcting the corrector is the surest method of curing him and riding the neighborhood of an insufferable pest.

Safety In The Air

The assistant secretary of the navy in charge of the bureau of Aeronautics says that there was only one fatal accident to every million miles of airplane flight in the United States last year. A comparative study of last year's fatal automobile accidents and the total motor mileage might indicate that the air is now safer than the highways.—Providence Journal.

Edmonton Public Utilities

All former records have been broken for Edmonton's profit from public utilities by the showing of a surplus of \$507,785. This surplus placed all the utilities—street railway, power, plant, electric light, city telephone and water works—in the profit-paying class.

Him—I don't like you inviting that fellow to dinner. He used to kiss you before we were married.

Her—Well, so did you.

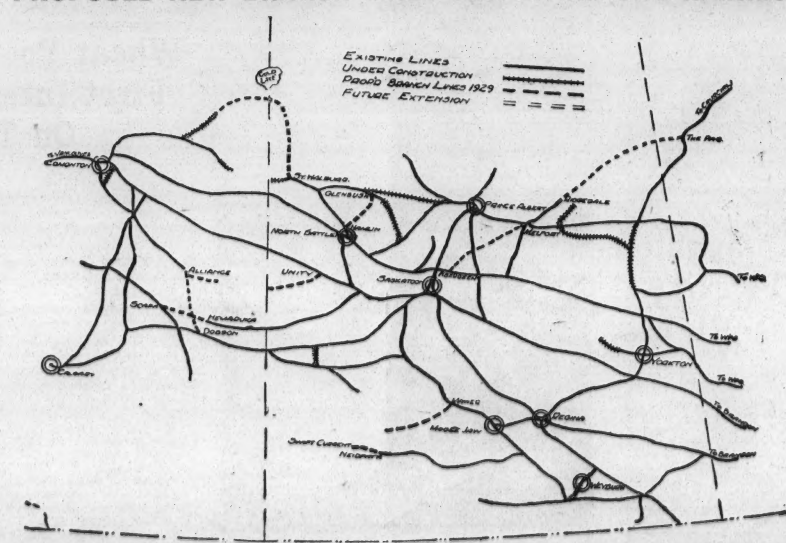

Him—Yes, but I've got over it and maybe he hasn't.

Sewing circles are out of fashion—there is no little to sew.

HONEYMOON.

"Take that, you brute. I shall write to mamma and tell her you were going to strike me."—Rue Humor, Madrid.

PROPOSED NEW BRANCH LINES FOR C.N.R. ON PRAIRIES

The Canadian National Railway is asking Parliament, at its present session, for the right to construct 666 miles of new railroad. Of this amount, 542 miles are to be built on the prairies. The proposed lines fall into two general classes; lines which afford economic and opening advantages to the system and branches for the purpose of general development and colonization of territory which will constitute feeders to the system. The proposed lines and their relationship to existing lines and to lines now nearing completion are shown on the above map. The proposed lines are indicated by broken lines. Existing lines are shown in solid black lines which are under construction and all of which will be ready for operation this year, are shown by a jagged line. The company proposes to complete all the new branch lines within three years.

One of the most important of the proposed lines is that between Aberdeen and Melfort, in Saskatchewan. This line with the proposed extension north-easterly from Ridgedale, will shorten considerably the distance between the Hudson Bay Railway and all of the territory south-west of Saskatoon.

The branch line programme summarized is as follows: St. Walburg, Sask., to Honeyville, Alta., 117 miles; Aberdeen, Sask., to Melfort, Sask., 30 miles; Hamilton, Sask., to Glenbush, Sask., 39 miles; Neildpath, Sask., to Swift Current, Sask., 31 miles; Ridgedale, Sask., north-easterly 30 miles; Alliance, Alta., southeasterly to Dobson, Alta., 82 miles; Eau Claire, Alta., south-easterly from the proposed Alliance-Dobson line, 25 miles; Hemaruka, Alta., to Scapa, Alta., 41 miles.

ECZEMA
Am-Buk

Quickly soothing and healing Am-Buk is splendid for skin troubles of all kinds. It heals with the aid of Nature's herbs, in Nature's own way.

THE CRIMSON WEST

—BY—
ALEX. PHILIP

Published by Special Arrangement
With Thomas Allen, Publisher,
Toronto, Ont.

CHAPTER XV.—Continued

For a moment Connie was silent. "When—when my dreams come true," she responded with an embarrassed smile.

Then he told her of the city and its ways and the things people did. She listened, not with amazement, but with a contented smile, as though what he told her was confirmation of her dreams. But when he told her of the grand opera, the music, the costumes and the singing, her grey eyes wide with longing, she sighed deeply.

Donald's voice trailed to a drowsy close; his chest rose and fell regularly, his features relaxed. He felt as though he were floating, exquisitely floating, on a sea of fleecy clouds that was bearing him softly away. A delicious languor enthralled him—an enchantment drowsy and dim. He felt himself drifting, drifting. . . . He was asleep.

The willows at the lower end of the meadow were pushed cautiously aside, and Hand's head appeared in the opening. For two days he had lain hidden awaiting an opportunity to waylay Donald. The day after the fight he had boarded the train for the coast, but had slipped from the car at the station below.

His face—unrepentant at its best—was now a horrible sight. The thick lips were swollen and cracked, the eyes discoloured and puffed, and the broken teeth bared in a snarl as he saw Donald lying by the stream. Every hour since the fight Hand's hatred for Donald had grown blacker. He would show him that he, Ole Hand, deserved his reputation as a fighter. He would hold this crippled man helpless while he showered blows on his unprotected face, make him cry out for mercy on bended knees; perhaps kill him. His hatred grew hotter and deeper as he watched him lying peacefully beside the girl who had been the cause of the fight in which he had been ignominiously whipped.

Connie sat gazing down on the sleeper. A sudden thought seized her, bringing a warm flush to her cheeks. Why not? No one would ever know. Would she dare? She glanced timorously about her, then leaned slowly over, her curls falling about her face, and touched her soft lips to Donald's cheek.

A hush came derisively. Connie came to her feet, her face crimson. Donald stirred, opened his eyes, and painfully raised himself. "I'm sorry, Connie," he apologized, "it was very rude of me to go to sleep."

A moment later he walked down the hill. Connie accompanied him a short distance, then turned up a steep path, and from a high, rocky ridge she watched him retreating figure as he turned toward the dom.

A huge bucket on a cable, that had been used during construction for carrying men and material across the roaring chasm below the ruins, still hung above the boiling waters.

For Donald there was a certain thrill, a keen exhilaration, in swinging in mid-air in this crude conveyance. He stepped into the bucket and with his one good arm pulled it along the rusty cable.

The Breed, hidden near the trail, saw Donald as he walked toward the dead. The vigorous look in his eyes gave place to one of strained interest as he saw the two men skulking menacingly after the unsuspecting man. With a feeling of malignant exultation, as he sensed disaster to the man he hated, he hobbled to the trail and furtively followed.

From the heights above Connie saw the sneaking figures as they crouched low against the edge of the dark spruces and at once divined their murderous object. For an instant she was paralyzed with terror. Her lips refused to move and her limbs grew numb.

The men moved cautiously as they approached their intended victim, fearing that he might be armed. As Hand saw Donald suspended over the river a look of furtive elation crossed his features. Here was a chance to dispose of his enemy with no trace of the crime. He tore a fire-axe from the wall of the tool house and ran to the awaiting cable.

"Joe! Joe! Stop them. Stop them!" Screeching again, she plunged straight down the hillside in a mad race to reach the scene of action. Running like a deer, stumbling and falling, her breath coming in short gasps, she ran wildly on. Snarls of the thorny crabapple tore at her, devil-club lacerated her face again and she felt no pain. "O God," she prayed aloud, "help me to save him! Help me save him!"

Donald's face blanched at the sound of the axe as it bit into the heavy cable. He looked down at the jagged rocks and seething waters below. Then with closed eyes and a prayer on his lips he tore in mad frenzy at the rope. Desperately he tugged with both hands, although the pain from his broken wrist sent a wave of torment up his arm that sickened him.

No man can measure the speed of thought in a crisis; even the sluggish brain of the Breed functioned rapidly. Connie was not for him. Her happiness was bound up in the man working feverishly at the haul-bulldozers. There was not one chance in a million that he would gain the safety of the cliff before the strands parted to plunge him to eternity. As he heard the crashing of Connie's slender body as she tumbled down the hill, a softness crept into his eyes. With a speed incredible in one with his pitiful deformity, he ran in a series of bounding steps to the edge of the bluff. The noise of tumbling waters drowned the sound of his approach. Just as Hand raised his axe for the final blow, the muscular arms of the Breed were flung about him. Emitting a startled curse, the big man turned and with a twist of his powerful shoulders flung his adversary assailing to the ground. As he rose Hand swung viciously at him with the axe.

With a quick movement the Breed dodged, and the weapon flashed over his head, flew from the big man's hands, and struck his confederate a glancing blow on the shoulder that brought from him a howl of pain. Again the Breed's arms closed about his adversary's waist. Mad with the pain in his shoulder, the foreigner drew long, keen knife, circled warily about the two wrestling men until he found an opening, then plunged the knife to the hilt in the Breed's left side. The stricken man groined from his opponent's arm and fell a crumpled heap to the ground.

Sick and giddy, Donald stumbled from the bucket, seized the axe and advanced weakly toward Hand. Hand's accomplice, taking one look

at the prostrate body, turned and fled terror-stricken to the woods. Hand hesitated for a moment, then followed heavily after.

At this moment, Connie, with clothes torn and hair dishevelled, broke from the woods, and with a cry of pity flung herself to the ground by the Breed's side and placed his head on her lap. The eyes of the wounded man flickered slowly open. He tried to speak, but a strong convulsion shook his frame from head to foot and he writhed in desperate agony.

Connie's face as she lifted it to Donald was drawn with grief. "Get me some water please," she said brokenly.

The dying man's lips moved. Connie leaned closer.

"I—I—love you," he whispered faintly, "I—saved him—for you."

A ghastly pallor spread over his features and his lips were widely parted in a struggle for breath. Again his lips moved in a fluttering whisper. "Connie—will—you—kiss me?"

As Connie pressed her tear-wet face to his pain-contorted features relaxed in a smile of wonderful peace and his eyes closed.

When Donald returned Connie's head was bowed and she was weeping softly.

"How is he, Connie?" he questioned gently.

"He's dead."

Donald removed his hat and knelt with bowed head.

"He died for me," he choked.

"And for me," she whispered inaudibly.

CHAPTER XVI.

Let us tire of monotony, Nature gives us a change of colour for each of the flowering seasons. Flowers of every hue may be found through the different months. Pink for May, red for June, blue and pink for July, and during August royal robes of gold and purple clothe the hills and valleys.

The last week of August brought to Summit Lake a pageantry of colour that the Coast region is denied owing to the persistent rains that retard the ripening of the leaf. The deciduous trees were already withdrawing their life-giving fluid from the leaves to store it in their roots until spring. The willow, vine maple, birch and alder along the creeks and lake-shore held touches of autumnal colouring; while on the hills the yellowed leaves of the cottonwood were brilliant in their setting of sober dark green canopies.

A gauzy red were the vine maples, but there was a leafy beauty greater than theirs. The flowering dogwood blazed from every nook and cranny. The ripening of the dogwood gives us a leaves a flame that burns with a fierce glow, a glow that further ripening deepens until its crimson flush becomes the loveliest hue of the British Columbia woods.

The freeweed, or willow herb, that in July gives to the open spaces a gorgeous tint of blue, pink, were now losing a flock of seeds to float away like tiny parachutes. Each small bit of fluff held a minute germ of life that would build a plant as large as its parent when, dropped by the friendly wind, it reached a fertile spot. The stately cottonwood were sending out a life-fluff as tiny as that from the smaller plants. Thistles, cat-tails and asters hurried to join the alkaline clover until the air was misty with these germ balloons, seeking their winter's rest. The red elderberry and its magenta neighbour, the thimble berry, with its truculent Scotch cap, gave to the woods a material flame.

A curious timidity had come over the birds; not only were they quiet but they were no longer to be found in their usual haunts. In some retired spot they were moulting. While the weather was at its best, and food was the most plentiful, they were dressing themselves in a new set of feathers for their long flight to the south. The tops of the tall pines were filled with sweet twitterings, of flutterings out and in, wing trails and quick short flights. A flock of waxwings had gathered for the migration. They would not leave for some time yet, but the change had come. Birds from the north had arrived, creeping south by easy stages, taking plenty of time in their journey—the forest creatures that live, staying or going as they feel inclined.

(To Be Continued.)

What League Has Cost Canada
The League of Nations has cost Canada \$1,636,515.70 since its inception to the present, was the reply in the House of Commons to a query by T. L. Church, Conservative, Toronto, N.W.

When a carefully considered plan promises success, never hesitate to take the chance.

Little Helps For This Week

"And Jesus saith unto them, How many leaves have ye?—Matthew xv. 34.

So still, dear Lord, in every place Thou standest by the tolling bell With love and pity in Thy face, And givest of Thy help and grace To those who meekly bear the yoke.

The lives which seem so poor and low, The hearts which are so cramped and dull, The buffed hopes, the impulse sold, Thou takest, touchest all,—and lo! Thy blossom to the beautiful.

—Susan Coolidge—

"How many leaves have ye?" It is the Lord's first question; and the hands of those who really want His help search their robes to see what they have hidden there. One brings his joy; another brings his pain; another brings his helpless desire; another brings his poor resolution; and there has nothing to bring except just his sorrow that he has nothing. It is a poor collection—only seven leaves and a few little fishes,—but it is enough: His blessing falls upon them, and they come back to the souls which gave them up to Him multiplied in the means of healthy, holy happy life.—Phillips Brooks.

Savings Certificates Popular

That Alberta Government Provincial Savings Certificates are recognized as a sound investment is indicated by the fact that sales during 1928 reached a total of \$815,960 over and above all withdrawals. The net purchases during the year were more than double those of 1927. A report for the year by the Treasury Department places the total amount of outstanding savings certificates at \$11,264,940. These certificates are held largely by farmers of the province.

Laugh heartily, speak kindly, and serve willingly.

No Ground For Pessimism

Statistics Show Large Percentage Of University Graduates Remain In Canada

An independent survey of figures dealing with the whereabouts of our university graduates is somewhat enlightening in the way of refuting exaggerated statements to the effect that they are flocking to the United States. The latest available statistics show that 82.8 per cent. of the living graduates of the University of Toronto are resident in Canada, and only 13.6 per cent. in the United States; the University of Western Ontario has retained 80 per cent., while 93 per cent. of the University of Manitoba's graduates have remained in their native country. This story finds a repetition in almost every college in the Dominion. Moreover, many graduates have found their way elsewhere only temporarily and will return in due course. Evidently there is not so much room for pessimism as many have imagined.

STORMY WEATHER HARD ON BABY

The stormy, blustery weather which Canadian experience during February and March is extremely hard on babies and young children. Mothers make it necessary for the mother to keep them confined to the house, whose rooms may be over-heated or badly ventilated. The little ones catch cold and their whole system becomes racked. To guard against this a box of Baby's Own Tablets should be kept in the home and an occasional dose given the baby to keep him fit, or a cold suddenly grips him to restore him to health again and keep him in good condition till the brighter, warmer days come along again.

Baby's Own Tablets are just what the mother needs for her little ones. They are a mild but thorough laxative which regulate the bowels, sweeten the stomach; break up colds and simple fevers; banish constipation and indigestion and make the cutting of teeth easy. The Tablets are sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Only the office with no salary attached is obliged to seek the man.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville's. Half a teaspoonful of Nerville's in water makes most effective gargle. The germ-killing properties of Nerville's quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with Nerville's. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerville's and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer; as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective means of the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increased the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light hit strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fix. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanatoriums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE about 14 ozs. while a square yard of glass of ordinary thickness weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Send for booklet "WINDOLITE"

High River Curlers Guests of Locals

Two rinks of the High River
curling club motored to Crossfield
on Wednesday, February 27th, to
play friendly games with the local
curlers. After a enjoyable after-
noon spent at the rink, with High
River winning both games by a
narrow margin, the players par-
took of a luncheon at the Oliver
Cafe. After the luncheon several
speeches were delivered by the
members present and thoroughly
enjoyed.

Tractor School

A school of instruction for tractor
owners and prospective purchasers
will be held in W. Lau's ware-
house on Saturday, March 9th.

Maintain The Quality Of Alberta's Crops

BETTER SEED

means

Better Yields — Better Grades — Better Prices

A special committee appointed by the Minister of Agriculture, with
the co-operation of numerous organizations in the province, is urging the
use this spring by farmers throughout the province of

High Quality, Clean, Treated Seed Grain

in order to reduce the heavy annual losses sustained by sowing inferior
seed.

Farmers can co-operate by:

1. Using registered seed wherever available.
2. Using at least high quality commercial seed.
3. Having seed tested for germination and purity.
4. Treating seed for smut.
5. Thoroughly cleaning all grain intended for seed.
6. Seeding only varieties of recognized quality and variety suitable to
the district.

Good seed will be in demand this spring. Secure your requirements
early—before the supply is exhausted.

U. F. A. Local, Board of Trade, the Wheat Pool, Banks, Commercial
Grain Firms, the Press, and many other organizations are working in co-
operation with a—

BETTER SEED COMMITTEE

consisting of representatives of the Provincial Department of Agriculture,
the Dominion Seed Branch, the Canadian Seed Growers' Association, the
Alberta Seed Growers' Association, the C.P.R. Agricultural Department,
and the University of Alberta.

D. A. McCANNEL,
Provincial Publicity Commissioner, Secretary.

Calgary Chinese Win From Crossfield

The Chinese Hi Y hockey team
motored to Crossfield last Friday
and played a return game with
the locals. The two teams were
evenly matched and a clean game
was witnessed by the spectators.
The Chinese boys relying on team
work and combination emerged
victorious by a score of one to nil.
Harry Khong scored the win-
ning goal for visitors in the early
part of the first period.

The Crossfield boys played a
hard game in the third period,
playing puck around the Chinese
goal and bombarded him with
shots from all angles without no
results, for the goalie kicked and
punched the rubber out like a
football but managed to say the
game for his team. G. Whitefield
played well in goal for the locals.
This will likely be the last game
of the season unless the ice is re-
flooded.

Carstairs Plays Close Game with Innisfail Curlers

Two rinks from Carstairs visited
Innisfail in hopes of winning
the Kremer cup, but unfortunately
they lost by one point.

Freeman Innisfail, defeated Hall
15 to 9 and Pepper, of Carstairs,
defeated McKay, of Innisfail 17-12,
total 26 to 27 favor of Innisfail.

The is still much sickness in
the district and the winter weather
still with us we may not look
for much improvement until the
warmer weather comes.

March 21st is the first day of
spring, if cannot come to soon.

From all reports there are quite
a few people in the district motoring
to Calgary to participate in the
oil boom.

Mrs. R. Arnott entertained Mrs.
D. McPayden, Mrs. P. Baker and
Miss Arnott in Calgary, Tuesday,
at the new Eaton dining room.
A very enjoyable time was had.
